

one consistent look three hardware choices

It all adds up to cost savings, without sacrificing aesthetics, safety or security.

CL3300
Extra Heavy-Duty Grade 1:
for high-frequency commercial
and institutional applications

CL3500
Heavy-Duty Grade 1:
for commercial and institutional
applications where a rigid lever
in the locked position is desired.

CL3800
Standard-Duty Grade 2:
Designed to compliment the
CL3300 and CL3500 locksets
for lighter duty applications in
the same facility

Imagine a consistent design aesthetic from a main entrance to an office or apartment door, stairwell, secured area or conference room while every doorway in the building functions exactly as needed for the application.

Corbin Russwin design solutions make it possible for a building to have Grade 1 and 2 hardware that complements an architect's vision. The hardware can be as visually appealing as they are strong and durable, regardless of the function of the opening. The economic flexibility, ease of installation and quality of performance and design – all make Corbin Russwin the choice for those who won't compromise beauty or security.
