

CL3300 Series

CL33900 Electrified Cylindrical Lock

CL33900 Electrified Cylindrical Lock Now Available with Request to Exit (REX) Monitoring Option

Corbin Russwin is pleased to announce that the CL33900 electrified cylindrical lock is now available with request to exit (REX) monitoring. Request to exit (REX) monitors the rotation of the inside lever trim and can be integrated into an access control system.

CL33900 Electrified Cylindrical Lock Features:

- Self-contained integral solenoid allows installation in standard cylindrical prep
- Available in either 12 or 24VAC/VDC
- Available in fail safe and fail secure modes
- SPDT (Single Pole Double Throw) switch
- ElectroLynx® 8-pin connector
- Mechanical cylinder override

How to Order:

To order the REX option with the CL33900 cylindrical lock specify M92.

Quantity	Series/ Function	Trim	Finish	Hand	Voltage	Miscellaneous Options
6	CL33903	AZD	626	RH	12AD	M92
