

Mortise Lock

Enhancements to ML2060 Mortise Lock Function

ML2060 Product Enhancements

In our pursuit of continuous product improvements, Corbin Russwin is pleased to announce an enhancement to the ML2060 mortise lock function. The enhancement includes updates of the lock components to ensure the door unlocks when closing the door, and eliminates the auxiliary latch.

Outside	Inside	Series/ Function	Type	ANSI No.	Function Description
		ML2060 	Privacy	F22	<ul style="list-style-type: none"> • Latchbolt by grip either side, except when outside grip is locked by thumbturn inside. • Operating inside grip, closing door or operating emergency key outside unlocks outside grip. • Inside grip always free.

How To Order and Pricing

Pricing is not affected by this change.

Implementation

The enhancement to the ML2060 is being implemented as a running change and has been phased into production.

For a full function description see the ML2000 Series Mortise Lock Catalog. Changes to the catalog have been made and is available on the Corbin Russwin website.
