

## “Emhart” Security Cylinders for existing systems only

Effective January 1, 2004, the “Emhart” Security Cylinders will be considered **inactive** and no longer available for new master key systems. Corbin Russwin will continue to indefinitely support all existing systems with master keyed cylinders, components (plugs, pins, uncombined cores and /or cylinders), keyblanks and Key Systems Administration assistance.

The cylinders and quick codes affected are the following:

Description	Cylinder	Quick Code
Fixed Core Mortise	1010, 1011, 1012, 1014, 1015	
Fixed Core Rim	3010, 3012	
Component/Deadlock	2010, 2011, 2210, 4210	
IC Core Mortise Complete	1090, 1091	
IC Core Rim Complete	3090	
IC Core Only	8010, 8011	
Lockset/Exit with Fixed Core		HS
Lockset/Exit with IC Core		CHS
Keyblanks		KB90, KB91, KB92, KB93, KB98, KB99

Customers may submit a list to their local sales agency representative of projects that may be in process and are expected to have orders placed for these cylinders. The list must indicate the facility name and location along with the expected date that Corbin Russwin will receive the order. Only orders for new projects that have been listed will be accepted for processing after February 3, 2004.

After February 3, 2004, all purchase orders placed for any of the above cylinders and/or keys **must** reference a specific facility. All cylinders **must** be ordered either uncombined (UC) or master keyed to a specific registry number as on file with Corbin Russwin. No cylinders will be furnished keyed random (KR).

For more information, please contact your local sales agency representative.
