

CL3900 Series

CL3900 Cylindrical Lock Discontinued

Corbin Russwin CL3900 Cylindrical Lock Discontinued; Replaced with the CL3800 Cylindrical Lock

Effective March 31, 2010, the Corbin Russwin CL3900 ANSI/BHMA Grade 2 standard duty lock will be discontinued.

Corbin Russwin will accept orders for the discontinued CL3900 series lock until March 31, 2010. Orders received after March 31, 2010 for the CL3900 series lock will automatically be switched to the CL3800 series lock. Replacement parts will be available until March 31, 2011.

The CL3800 ANSI/BHMA Grade 2 standard duty lock will replace the CL3900 lock. Its lock design complements the look of the ANSI/BHMA Grade 1 CL3300 series extra heavy-duty cylindrical lock and the ANSI/BHMA Grade 1 CL3500 series heavy-duty cylindrical lock. This provides a consistent design aesthetic from a main entrance to an office to a stairwell without compromising the security needs of the door opening. In addition, the ANSI/BHMA Grade 2 CL3800 cylindrical lock has a seven year warranty.

CL3800 Features:

- ANSI/BHMA Grade 2 Certified lock
- Lever Release™ lever design for vandal resistance. This design allows the outside lever to rotate when in the locked position.
- Through-bolts prevent chassis rotation; ensure proper alignment and smooth operation.
- Solid cast levers
- UL 3-hour fire rating
- 7-year warranty
