ADJUSTABLE HEAVY-DUTY CONCEALED AND SURFACE STOPS AND HOLDERS

Rixson is pleased to announce two new models to its already wide range of Checkmate[®] overhead stops and holders.

The new 1ADJ concealed model and the 9ADJ surface mounted model are units that have limitless possibilities for stocking wholesalers, contract hardware distributors and door and frame manufacturers.

Standard Features

- Concealed 1ADJ may be used on single or double acting doors
- Surface 9ADJ for single acting doors
- Non-handed
- For heavy and high traffic doors
- Available with security screws for exposed surfaces
- Screw packs include wood, machine and through bolts
- 85°-110° opening (see chart for exceptions)
- 1-3/16" square track
- Stop function UL listed for fire rated assemblies

Added Feature

- When packaged as a multi-function model, a kit allows a stop unit to be made into a hold open.

Benefit

- Stocking distributors will need only half the inventory
- Contract hardware distributors don't need to worry if an owner wants to change their mind about the function AFTER the order has been placed with *Rixson*

Added Feature

- One template location on the door accommodates all degrees of deadstop or hold-open.

Benefit

- No longer the need to know exactly how far a door can swing before the door and frame are ordered.
- Easier preparations for door and frame manufacturers.

Added Feature

- Hold open is in the new patented track, no need for a turn knob on the face of the door
- Aesthetically more appealing

Units may be ordered specifically for hold open or stop functions and will be shipped with only those parts. If multi-function is desired they will be shipped as stop with a kit to make it a hold open unit.
