

HP3000 Series

Discontinuance of 626 Finish

Discontinuance Notice

Effective immediately, Corbin Russwin will discontinue the 625 (bright chrome) and the 626 (satin chrome) finish for all HP3000 Series Tubular Locks with HPSK Push/Pull Trim. These finishes will be removed from all catalogs and price books associated with these products.

In lieu of these finishes, Corbin Russwin offers Polished Stainless Steel 629 and Brushed Stainless Steel 630 finishes. Stainless steel finishes provide corrosion and rust resistance as well as low maintenance for the most demanding applications. This makes them ideal for environments such as healthcare and education. See the updated Marketing collateral materials, attached, for pricing and more information.

Please distribute this bulletin to everyone in your distributorship who specifies and/or purchases products. Furthermore, insert this bulletin in the Specialty Hardware section of your Corbin Russwin full line catalog.

For additional information, contact your ASSA ABLOY Door Security Solutions sales consultant or visit www.corbinrusswin.com.
