

7380F Series

Multi-point Locking System

a windstorm solution engineered to save lives

Yale® 7380F Series is a three-point auto deadlocking system developed to help protect lives while primarily securing a community shelter and safe room entry. Extra heavy-duty steel components firmly fasten the door to the frame - at top, bottom and center latch points - reinforcing the opening to endure severe wind speeds and flying debris.

The 7380F is fully integrated - part of a complete ASSA ABLOY tornado and hurricane resistant solution with CECO StormPro® 361, CURRIES StormPro® 361 and FLEMING BARON F-5 doors and frames and MCKINNEY® SP hinges.

certifications/compliance

Fire Listing

All functions are UL-cUL Listed for use on fire doors having a rating up to and including 3-hours.

Windstorm

Certified (refer to local codes). 7380F series are UL certified for inswing and outswing doors; single door 4'0" x 8'0" maximum to the following guidelines:

Tornado and Hurricane Shelters

- FEMA 320
- FEMA 361
- ICC 500

Hurricane

- ANSI/BHMA A250.13
- ASTM E330, E1886, E1996
- TAS201, TAS202, TAS203

Note: Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Yale Locks & Hardware makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

backset

2-3/4" (70mm) standard only.

cylinder

1-1/8" (29mm) brass, 6-pin, PARA keyway, keyed random cylinder with two nickel silver keys furnished standard. Optional cylinders available. See page 7-8.

handing

Handing must be specified (RH, LH, RHR or LHR).

bolts

Top Latchbolt: 5/8"

(16mm) stainless steel housing. Through-hardened steel latchbolt with 7/8" (22mm) projection fortified with 1/4-20 steel Holo-Krome® fasteners.

Center Deadbolt: One-piece stainless steel with 1" (25mm) projection.

Bottom Bolt: 3/4" (19mm) diameter steel with 3/4" (19mm) projection and 1/8" (3mm) steel reinforcement plate.

fronts

Top: 1/8" (3mm) thick, through-hardened steel.

Center: 1-1/8" x 4-7/8" x 3/16" (29mm x 124mm x 5mm) thick stainless steel, one piece.

strikes

Center: 1/4" (6mm) thick, stainless steel.

Bottom: Brass with 1/4-20 Holo-Krome® fasteners.

door thickness

Standard for doors 1-3/4" (44mm).

door height

The 7380F series are standard for any door or window storm shutter from 6'8" to 8'0" height. For window storm shutter applications, 1'8" x 3'0" to 4'0" x 6'8" height refer to 7370 series catalog.

2. Formerly 613 prior to May 1, 2010

3. Trims are plated to simulate stainless steel.

 Finish available with MicroShield® antimicrobial coating, additional finishes by special application. Consult factory for availability.

features and applications

applications

This device is ideal for doors and inswing window storm shutters in Community Shelters and Safe Rooms, Corporate Campuses, Schools, Healthcare Facilities and Government Facilities.

warranty

The 7380F series multi-point lock carries a 7-year warranty.

operation

The 7380F features concealed vertical rods with a top latchbolt and bottom deadbolt which are complemented by an automatically projecting deadbolt at the center of the door. Operating the trim retracts the bolts simultaneously. Once retracted the bolts are held in position as the door swings. When the door is closed, the hold back feature of the device engages the frame and all bolts project simultaneously.

additional features

- Solid cast levers
- Heavy-duty escutcheon
- Through-bolted on door for solid attachment
- Extra heavy-duty steel components automatically secure the door to the frame at top, bottom and center locations.
- All multi-points are activated automatically when the door is closed

microshield®

7380F series multi-point locks are available with *MicroShield* antimicrobial coating. *MicroShield* is a revolutionary hardware finish coating, using a silver ion based technology, which inhibits the growth of bacteria, algae, yeast, fungus, mold and mildew. *MicroShield* is non-toxic and lasts for the lifetime of the finish to which it is applied. To order, suffix option code "YMS".

Note: *MicroShield* coating may vary finish color from architectural standards. *MicroShield* is not intended as a substitute for traditional infection control programs such as hand hygiene or use of disinfectants. Coated products must still be cleaned to insure the surfaces will be free of destructive microbes. Yale makes no representations or warranties, express or implied, as to the efficacy of *MicroShield*.

	SFIC	N/A	N/A	K620	K620	N/A	N/A	N/A	N/A

Refer to Yale® KeyMark® and/or Cylinders and Keys Catalog sections for all details and how-to-order examples.

Yale® KeyMark®

For those applications requiring protected key control, Yale® KeyMark® cylinders guard against unauthorized key duplication. The *Yale KeyMark Security Leg®* keyway feature increases resistance against picking and impressioning and can easily retrofit into existing systems. For further details and availability, refer to the separate *Yale KeyMark* catalog.

security cylinders

Security cylinders contain two independent locking mechanisms. The first is a traditional 6-pin tumbler mechanism with spool drivers for greatly increased picking resistance.

The second is an innovative 5-tumbler rotating disc mechanism with sidebar engagement. The rotating discs are spring loaded and block the bottom of the keyway.

suggested specification

Multi-Point Auto Deadlocking Devices shall be 7380F Series as supplied by Yale Locks & Hardware.

Multi-point auto deadlocking devices are engineered for use on inswing and outswing door applications at hurricane and tornado safe shelter room locations. Concealed, fortified steel construction secures the door to the frame at top, bottom and center positions. All three locking points shall be automatically activated when the device is closed and retracted with one single motion upon exiting.

Multi-point auto deadlock shall be part of an integrated door, frame and hardware assembly UL certified to FEMA 361, ICC 500, ANSI/BHMA A250.13, ASTM E330, E1886, E1996, TAS201, TAS202, and TAS203 for both inswing and outswing doors.

Device shall be manufactured in compliance with NFPA 80 and NFPA 101 life-safety requirements and UL-cUL approved for use on fire doors having a rating up to and including 3-hours.

Latchbolts shall be constructed as follows:

- Mortised Centerbolt:
 - Single piece, 13 gauge chrome plated steel lock case with 3/16" thick stainless steel front.
 - Stainless steel, 1" throw deadbolt.
 - 2-3/4" backset standard with 1/4" stainless steel centerbolt strike.
- Top Latch:
 - Through-hardened steel latchbolt with 7/8" projection
 - 1/8" steel latchbolt front
 - 5/8" stainless steel latch housing secured with 1/4-20 Holo-Krome® fasteners.
- Bottom Bolt:
 - 3/4" diameter steel nylon coated bolt with 3/4" projection and 1/8" steel reinforcement plate
 - Brass strike housing secured with 1/4-20 Holo-Krome® fasteners.

Devices shall be provided with heavy-duty escutcheon trim and solid cast levers matching the design style and architectural finishes as the balance of the locksets and latches specified.

All multi-point auto deadlocking devices shall have a seven-year limited warranty.
