

7370 Series Multi-Point Auto Deadlocking System

A Windstorm Solution Engineered for Window Openings

Yale® 7370 series is a three-point auto deadlocking system developed to help protect lives while primarily securing the community shelter window openings. Extra heavy-duty steel components firmly fasten the shutter to the frame - at top, bottom and center latch points - reinforcing the opening to endure severe wind speeds and flying debris.

Applications

The 7370 series is UL certified to FEMA 361, ICC 500, ANSI/BHMA A250.13, ASTM E330, E1886, E1996, TAS201,

TAS202, and TAS203 for inswing shutter applications. This device is ideal for window openings located in Community Shelters and Safe Rooms, Corporate Campuses, Schools, Healthcare Facilities and Government Facilities.

Features & Benefits

- Three-point auto deadlocking
- Inswing applications
- UL certified to FEMA 361, ICC 500, ANSI/BHMA A250.13, ASTM E330, E1886, E1996, TAS201, TAS202, and TAS203
